<b>Office Action Summary</b>	<b>Application No.</b> 10/529,296	<b>Applicant(s)</b> SHIMANO ET AL.	
	<b>Examiner</b> William B. Perkey	<b>Art Unit</b> 2862	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Claims 4-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 14, 2007.

### *Information Disclosure Statement*

2. The information disclosure statement filed March 25, 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. A copy of only one of the listed foreign references was found in the electronic file.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshii et al. (U.S. Patent No. 5,396,336).

Yoshii et al., in the embodiment that includes Fig. 12 (A), captures an image using the image pickup element 3; a second step is performed that detects feature data as the degree of focus in the upper region of the image; and then a third step is performed by adjusting the

Art Unit: 2862

position of the optical system 1 of the camera for focus in accordance with the feature data (degree of focus) extracted from the upper region of the captured image.

5. Claims 1-3 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by the Ohmi et al. article "Image Inclination Measurement Based on Edge Directions and An Analysis of Relation between Visual Inclination.

The Ohmi et al. article in the Abstract and Introduction fairly conveys to the ordinary workman in the art that the detected roll amount or inclination is used to bring the digitized image to the desired straight image. The article clearly discloses that perpendicular edge elements are extracted. The article fairly suggests the entire image portion is used to detect feature edge data and thus the upper portion is used. The claims do not specify that only the upper region of the image is used to extract the feature data and the correction amount is calculated using only the upper portion of the image.
